

ADDITIVE MANUFACTURING PLAN WITH CONFIDENCE. DELIVER SUCCESSFULLY.

We help organisations successfully implement additive manufacturing through independent system selection, facility planning, and installation support. From concept to commissioning, eqops reduces risk, improves readiness and accelerates operational success.

OUR ADDITIVE MANUFACTURING SERVICES

System Selection

Identify the right additive manufacturing technology and configuration for your applications, production requirements and long-term business objectives.

Facility Planning

Plan infrastructure, utilities and environmental controls to ensure safe, efficient and scalable installation.

Layout Optimisation

Design practical layouts that improve workflow, ergonomics, maintenance access and future expansion capability.

Compliance Support

Ensure facilities, documentation and operating practices align with applicable regulations and OEM requirements, including COSHH, ATEX, PUWER and LOLER where applicable.

Project Management

Coordinate installation activities, manage project milestones and reduce implementation risks from delivery through commissioning.

Operational Readiness

Prepare teams, documentation and processes for commissioning, production and long-term operational success.

WHY CHOOSE eqops

Independent Expertise

Supporting informed investment decisions through objective advice.

Practical Planning

Facility designs that work in real manufacturing environments.

Reduced Risk

Identifying issues before they become costly installation delays.

Future Ready

Planning for expansion, productivity and long-term scalability.

Operational Success

Helping achieve faster commissioning and improved return on investment.

SMARTER PLANNING. SUCCESSFUL IMPLEMENTATION

Independent planning that reduces risk, improves readiness and accelerates production

OUR PROVEN APPROACH

Assess
Understand Business Requirements.

Select
Evaluate System Options.

Plan
Design Facility Layout.

Prepare
Ensure Site Readiness.

Implement
Support Installation Activities.

Optimise
Improve Operational Performance.
